

Create Invoice – TCODE: EASIBI

Project Name: Utilities-EASIBI-Create Invoice

Version	Description
1.0.0	Create Invoice – EASIBI (TCODE)

INTRODUCTION

This program is used to create invoice by EASIBI transaction. This entire process will be automated using the Bot.

- Will be supported for SAP Logon on- Premise.

IMPORTANT NOTE

General

To use this sample, you need to have a basic knowledge and understanding of SAP Intelligent Robotic Process Automation tool. At the very least you need to know how to import a project, add and modify activities, build the solution, and export a package.

Required Inputs:

Input Field	Description
Installation	Installation Number
Meter Reading Reason	Meter Reading Reason as per user's requirement

DESCRIPTION

Automate the process of creating invoice using EASIBI transaction. This bot would help the agents create invoice document for customers for whom they have either received complaints or might have been missed as part of the normal BAU cycle.

Key Process Flows

- The bot takes input details from the user.
- Opens EASIBI transaction.
- Creates Invoice.

Business Benefits

- Reduce manual effort—an employee can concentrate on the more important tasks
- Ensure fast creating of invoice

VERSION

The product versions used to generate this sample are detailed below. This sample is provided “as is,” with no warranty that it will work correctly with other versions. If some versions of your software are different (such as the tool version or the target application version), you may need to recapture the application and/or update the workflow activities.

SAP Intelligent RPA

The table below details the versions used to generate this sample.

Software	Version
Cloud Studio	2.0
Desktop Agent	2.0.14.60
