Artifact: Groups Replication via SCIM

Version: 1.0.2

Description: The integration flow has been enhanced to support direct integration with SAP Cloud Identity Access Governance. Check SAP note 3278934 for more details

Date: 23 May 2022

Artifact: Users Replication via SCIM

Version: 1.2.1

Description: Bugfix for GlobalUserID mapping during GET user with filters API call.

Date: 9 February 2022

Artifact: Users Replication via SCIM

Version: 1.2.0

Description: CPI iflow is adapted with respect to C4C API change to replace attribute SAPUserUUID with GlobalUserID in C4C EmployeeAndUser OData service.

Date: 06-Aug-2021

Artifact: Groups Replication via SCIM

Version: 1.0.1

Description: Following bugs are fixed in Group Replication iflow:

- 1) Groups count in API now return as Integer instead of String for pagination query.

SAP Cloud for Customer Integration - Identity Provisioning via System for Cross-domain Identity Management- Change log

- 2) All Group API response switched from user UUID to employee UUID.

Artifact: Users Replication via SCIM

Version: 1.1.0

Description: Enhanced User Replication iflow to support UserUUID (aka SAP Global Unique Immutable User ID). UserUUID enables cross-application communication which can use a unique UserUUID for referencing a user provided by IAS.

Correction in package name:

Package name is updated from “SAP Cloud for Customer Integration - Identity Provisioning via System for Cross-domain Identity Management” to “SAP Cloud for Customer Integration with Identity Provisioning via System for Cross-domain Identity Management”
