

# Mass Creation of Business Solution Orders (6O3)

## Task Automation Capability and Feature Highlights

### THE PROBLEM

Customers often have to work with different teams for Bid-to-Bill or Order-to-Cash process, i.e. create Quotes, Orders, Plan, Sales, Services, Invoices, and so on. Once the orders are created individually, the customers have to coordinate between the orders to execute the end-to-end contract.

This process is very time-consuming, error-prone, and adds unnecessary manual effort.

### TASK AUTOMATION DESCRIPTION

- Automation reads the data from various tabs of the input file in the base folder and uploads the data into relevant fields of the Business Solution Orders Fiori application in SAP S/4HANA Cloud to create Business Solution Order.
- After processing is done, the automation sends an email notification with the log file.

### BUSINESS VALUE – BENEFITS

- Automate Business Solution Orders in SAP S/4HANA Cloud.
- Perform creation of Business Solution Order with reduced error.
- Help customers scale up by reducing manual effort and time required for Business Solution Order creation.
