## INTRODUCTION

This document describes the SAP Build Process Automation sample **Button** and provides the following information:

- Description (functional and technical)
- Version used to generate this sample

It also contains information on prerequisites, such as the steps to follow before launching the agent.

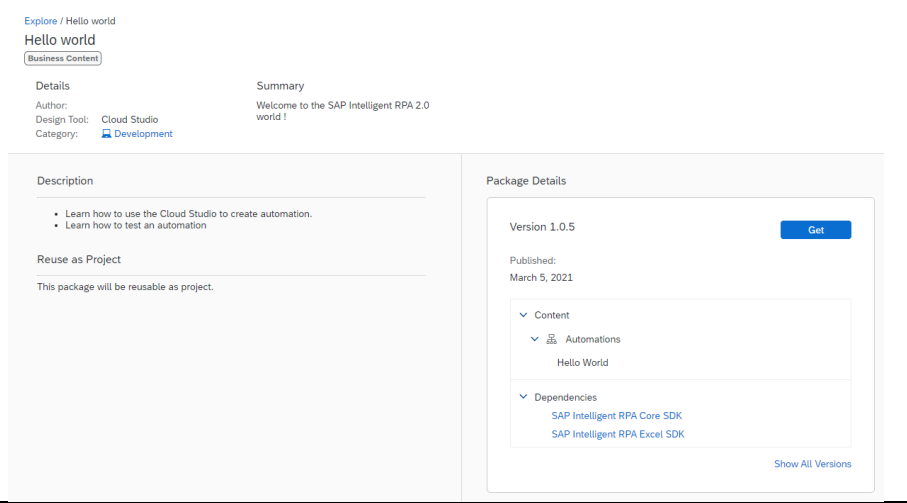

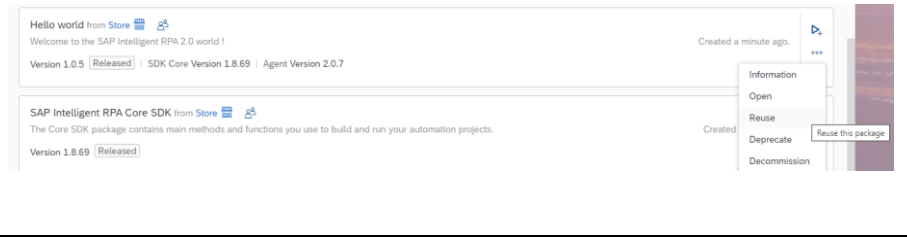

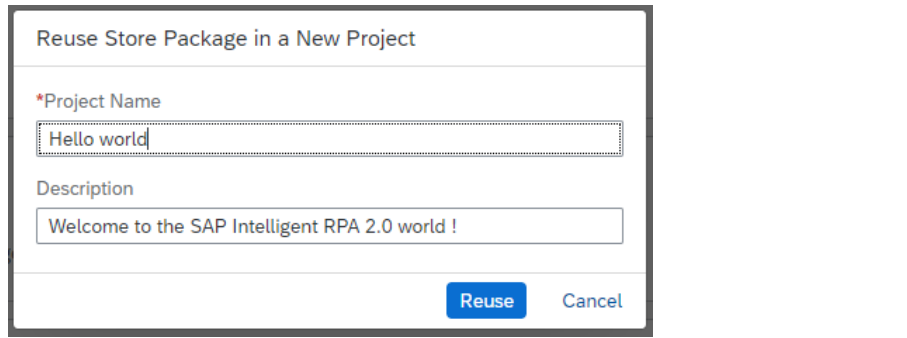

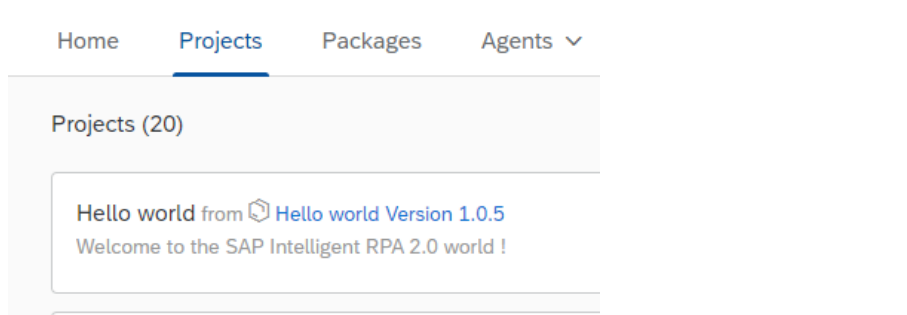

## IMPORTANT RECOMMENDATION

### General

To use this sample, you need to have a basic knowledge and understanding of SAP Build Process Automation tool. At the very least you need to know how to build an automation, add and modify activities and generate a package.

### Reuse the sample as a new project

*Note: screenshot might display a different name than the one of this sample.*

<p>From the Cloud Factory, open the Store tab and select the sample you want to retrieve.</p> <p>Click on the <b>Get</b> button.</p>	 <p>Explore / Hello world Hello world (Business Content)</p> <p>Details Author: Cloud Studio Design Tool: Cloud Studio Category: Development</p> <p>Summary Welcome to the SAP Intelligent RPA 2.0 world !</p> <p>Description</p> <ul style="list-style-type: none"> <li>Learn how to use the Cloud Studio to create automation.</li> <li>Learn how to test an automation</li> </ul> <p>Reuse as Project This package will be reusable as project.</p> <p>Package Details</p> <p>Version 1.0.5 <b>Get</b></p> <p>Published: March 5, 2021</p> <p>Content</p> <ul style="list-style-type: none"> <li>Automations             <ul style="list-style-type: none"> <li>Hello World</li> </ul> </li> </ul> <p>Dependencies</p> <ul style="list-style-type: none"> <li>SAP Intelligent RPA Core SDK</li> <li>SAP Intelligent RPA Excel SDK</li> </ul> <p>Show All Versions</p>
<p>Once the package is retrieved, open the Packages tab of the Cloud Factory.</p> <p>Click on the Options button of the package you just retrieved and select the option <b>Reuse</b>.</p>	 <p>Hello world from Store Welcome to the SAP Intelligent RPA 2.0 world ! Version 1.0.5 (Released)   SDK Core Version 1.8.69   Agent Version 2.0.7</p> <p>SAP Intelligent RPA Core SDK from Store The Core SDK package contains main methods and functions you use to build and run your automation projects. Version 1.8.69 (Released)</p> <p>Created a minute ago. ***</p> <p>Information Open Reuse Deprecate Decommission</p> <p>Created</p> <p>Reuse this package</p>
<p>Set a name for the project to be created.</p>	 <p>Reuse Store Package in a New Project</p> <p>*Project Name Hello world</p> <p>Description Welcome to the SAP Intelligent RPA 2.0 world !</p> <p>Reuse Cancel</p>
<p>Open the project that has just been created.</p>	 <p>Home Projects Packages Agents</p> <p>Projects (20)</p> <p>Hello world from Hello world Version 1.0.5 Welcome to the SAP Intelligent RPA 2.0 world !</p>
<p>If needed, update the content of this project, and generate a new package from it.</p>	

You need to execute this procedure to be able to open the project and see all its content (the captured applications, the declared items, the automations, etc.).

## DESCRIPTION

This package contains captures, datatype and automations that are described below. See chapter [Version](#) for more details about the version of the Desktop Agent and the SDK dependencies.

### Settings

This section describes the settings of the project such as environment variables or dependent packages that are used in the automation.

#### **Environment variables**

N/A

#### **Dependent packages**

N/A

### Captures

This section describes the captures which were made to pilot the application in this sample. It will also describe the different methods which were used to capture the pages and declare the items.

#### **Samples - Button**

**Type:** WEB

**Framework:** SAPUI5

Screen	Description
Samples - Button - HomePage	The first screen which we can choose which button control we want to automate
Samples - Button with Badge	The screen we can have button with badge control there.
Samples - Button	The screen we can have button control there.

### Datatypes

This section describes the datatype used in this sample. It describes the structure of the datatype and where it is used in the automations.

N/A

### Alerts

This section describes the alerts used in this sample. It describes the structure of the alert.

N/A

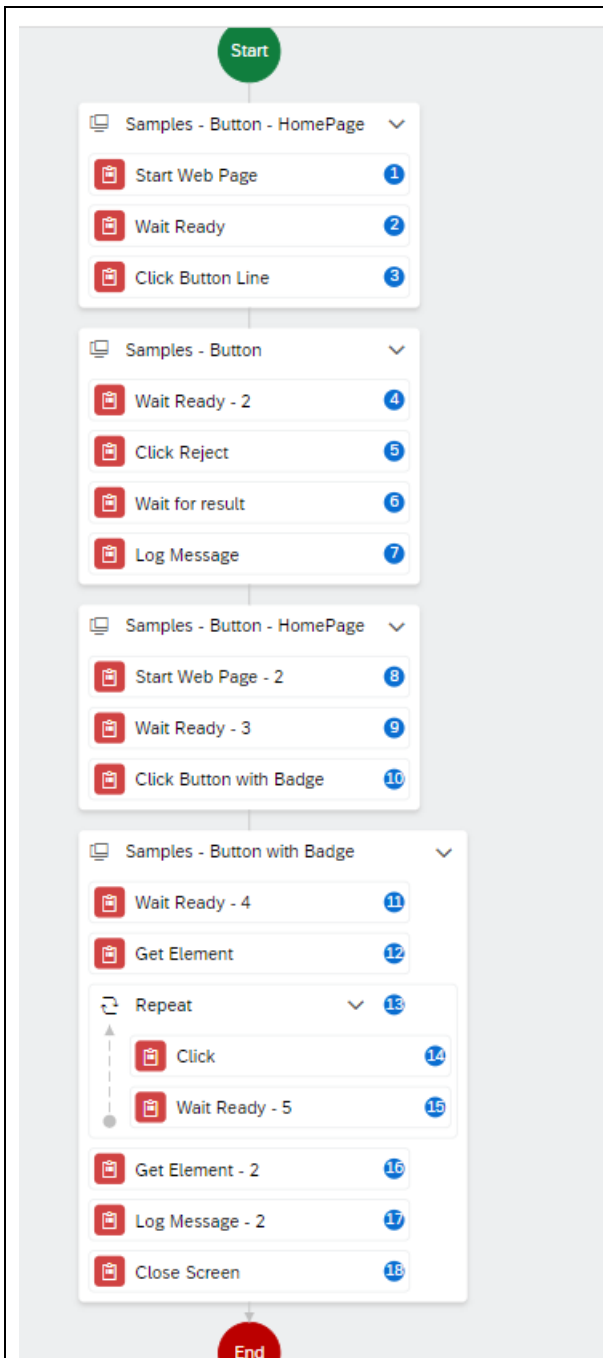

### Automations

#### **Button**

**Type:** Attended / Unattended

**Input:** N/A

**Output:** N/A

First the agent starts the web page

<https://sapui5.hana.ondemand.com/1.86.0/#/entity/sap.m.Button> in Chrome.

Then it choose the first line *Button* to open the *Samples - Button*. And wait for the page ready, click the reject button in the page and log messages of the actions are recorded in the meantime.

After the clicking, go back to the home page and wait for the page ready, then choose the second line *Button with Badge* to open the page *Samples - Button with Badge*. In this page, first get the current badge value, then repeat to add the badge as set. After add the requested value check the value again and log the message.

When finish all the activities, close the screen.

## VERSION

The product versions used to generate this sample are detailed below. This sample is provided “as is”, with no warranty that it will work correctly with other versions. If some versions of your software are different (such as the tool version or the target application version), you may need to recapture the application and/or update the workflow activities.

### SAP Build Process Automation

This sample targets the Desktop Agent **2.0.10** or higher.

The following SDK dependencies were used to generate this sample:

irpa_core	1.9.66
irpa_excel	N/A
irpa_outlook	N/A
irpa_pdf	N/A
irpa_ui5	1.9.66
irpa_word	N/A
irpa_powerpoint	N/A

See [documentation](#) for more details about the compatibility between SDK version and Desktop Agent.

### Target application

Application	Version
SAPUI5 SDK Demo Kit	N/A Date of last test: 2021/04/28

## PREREQUISITES

### **Global setup**

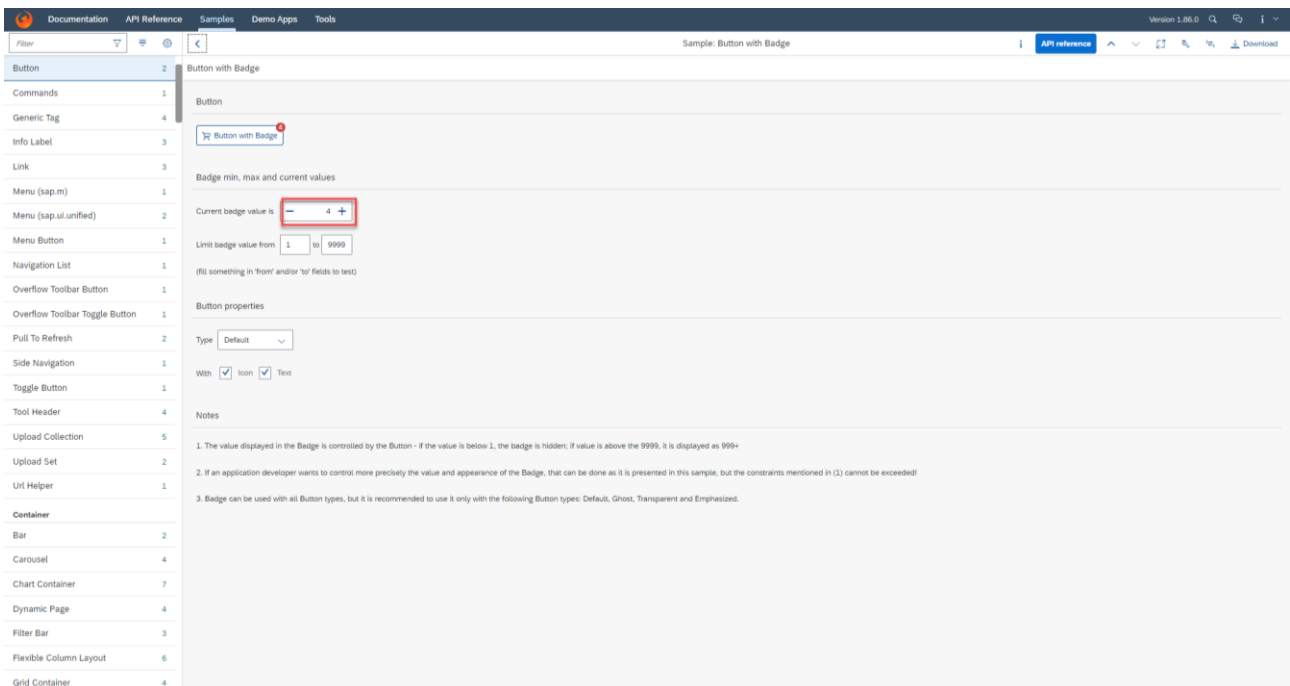

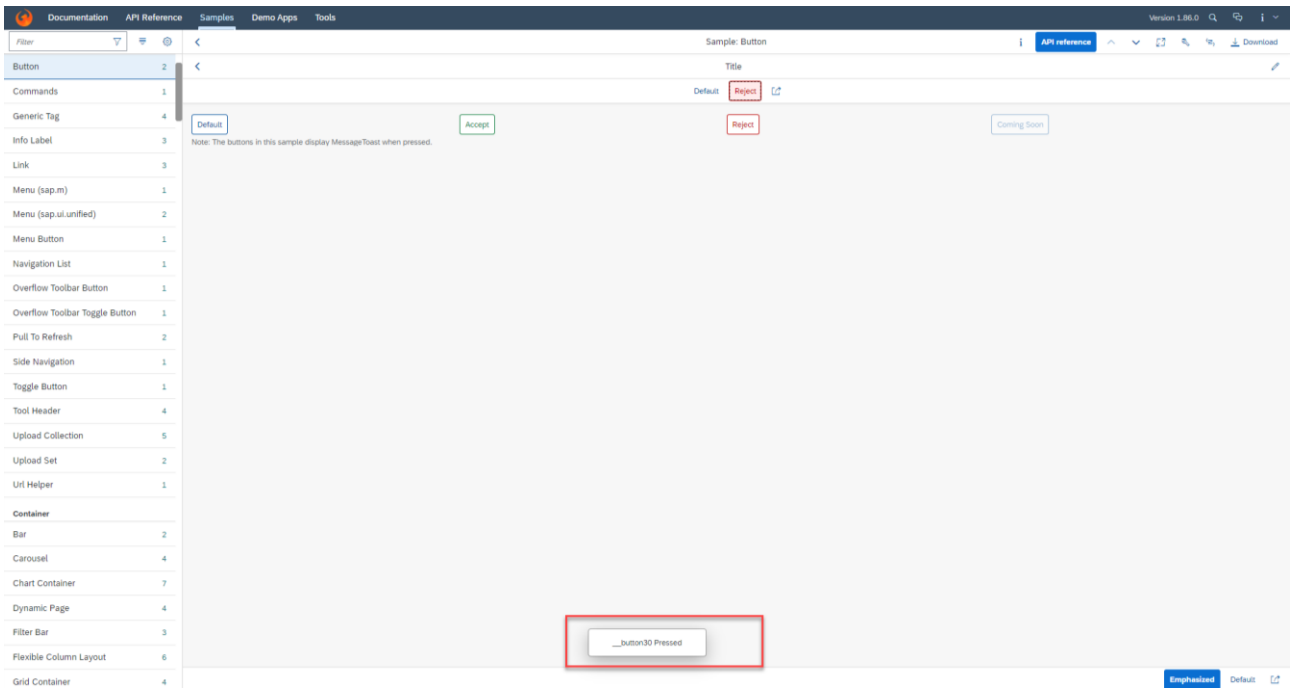

SAP Build Process Automation must be installed in accordance with the installation guide available [here](#). An SAP Build Process Automation Factory must be available with a suitable environment (containing an agent). All information can be found in the “Getting Started” section accessible via the above link.

### **Specific steps to follow before launching the agent**

N/A

## EXPECTED OUTPUT

During bot running, after each click action is executed, there will be a log message displaying on the bottom of the page. And you can see the button has been clicked and the number of the badge has been updated.
