

Mass Confirmation of Production Orders (49T)

Bot Capability and Feature Highlights

THE PROBLEM

After production orders have been evaluated and are ready to be released by manufacturing units, Production Officers manually and individually submit each production order in SAP S/4HANA for confirmation.

This task is slow, time-consuming, and tedious, especially as manufacturing units grow and receive even more production orders.

BOT SKILL DESCRIPTION

- Bot reads completed Production Order Operation templates placed in a specified base folder.
- Bot extracts information from files and sends it to SAP S/4HANA to confirm the order in the system.
- Bot saves log files to the same base folder.

BUSINESS VALUE – BENEFITS

- Confirms multiple production orders in one request.
- Increases efficiency and reduces time to confirm production orders.
- Reduces dependency on Production Officers, allowing them to scale up and focus on other high-priority tasks.
