

# Mass Creation of Purchase Orders (6VW)

## Bot Capability and Feature Highlights

### THE PROBLEM

Oftentimes, companies have to deal with a high volume of manual purchase orders that need to be created in the system. Creating purchase orders manually is a task that is time-consuming and prone to error.

### BOT SKILL DESCRIPTION

- Bot Input : Users provide the purchase order details in the Excel template file.
- Bot reads the input data for purchase orders from the Excel template file and creates the purchase order in SAP S/4HANA Cloud.
- Bot records the purchase order number of the created purchase orders in the Excel output file.
- Bot's log report is compiled and stored in the success and error folders based on the bot status.

### BUSINESS VALUE – BENEFITS

- Reduce manual effort to create purchase orders by automating the process.
- Reduce the scope of human errors creating erroneous records in system.
- Optimize data quality and transparency by generating log reports.
