

Version 1.0.1 Changes (March 21, 2024)

-Updated the previous change log by removing two functionalities from the “Content” section which were meant for the next future version release.

Version 1.0.1 Changes (December 2023)

iFlow Package

-Changed title from “BTP Integration Suite Package for Degreed” to “SAP SuccessFactors Integration with Degreed” and all corresponding branding text

Content

- Added functionality to update Degreed content metadata based on changes to learning items in SuccessFactors
- Added functionality to create Degreed content in languages other than English based on “locale” for the library the learning item resides in
- Added functionality to obsolete Degreed content items when a new version of the corresponding SuccessFactors learning item has a new version created
- Added functionality to import inactive learning items from SuccessFactors as obsolete content items in Degreed
- Added functionality to leverage Subject Areas on SuccessFactors learning items as content skill tags in Degreed

Required Learning

- Added functionality to delete a Required Learning record in Degreed when the assignment is no longer required in SuccessFactors
- Added functionality to update the due date of Required Learning records in Degreed when changed in SuccessFactors

- Added functionality to filter which “assignment types” in SuccessFactors will create Required Learning records in Degreed
- Added functionality to create Required Learning records in Degreed with NULL or no due date value

Completions

- Added functionality to update the completion date of a completion in Degreed when the completion date is updated in SuccessFactors

Users

- Added functionality to “disable login” as opposed to “terminate” users in Degreed based on various SuccessFactors statuses
- Added functionality to provision users at tenant level in Global Admin Tool (GAT) configurations

Global Admin Tool (GAT)

- Added functionality to write content to GAT org in a GAT structure as opposed to individual tenants
